Aayushi Jhaveri

Technical Product Manager @ Frog | Cambridge Engineering
London Area, United Kingdom

Experience

frog

Technical Product Manager

April 2026 - Present (1 month)

London Area, United Kingdom

Capgemini Invent

Associate Consultant

June 2025 - March 2026 (10 months)

London Area, United Kingdom

- Problem discovery and solution ideation for internal and client-facing digital tools, translating user and operational pain points into clear product requirements and wireframes.
- Delivered workshops and stakeholder sessions for a major UK retailer, shaping and pitching practical solutions to improve in-store and operational workflows.
- Contributing to a government post-quantum cryptography migration programme, developing strategy artefacts and execution playbooks to support secure, scalable rollout.
- Participated in a Nesta-led hackathon, co-building an early-stage product to improve children's cybersecurity through offline engagement.

UCL

Experiment Set-up Designer

September 2024 - October 2024 (2 months)

London Area, United Kingdom

- Collaborated on a study with the UCL Department of Experimental Psychology, designing and constructing custom slide-and-trolley apparatuses tailored for chimpanzee interactions.
- Engineered the system to accommodate chimpanzee-specific size, strength, and safety considerations.

The Little Car Company

Software and Electrical Engineering Intern

July 2022 - September 2022 (3 months)

Bicester, England, United Kingdom

- Collaborated with a multidisciplinary team to design the electrical system for the first Tamiya electric vehicle prototype, negotiating parts with vendors and arranging shipments.
- Identified and resolved software bugs in the DB5 Junior car dashboard using VCL, enabling production to resume.
- Conducted vehicle testing, analysed CANBus data, and optimised performance by identifying and addressing abnormalities.
- Led an ergonomics survey on dashboard layouts, presenting feedback to senior management and contributing to the creation of the first prototype.

Raspberry Pi Trading

Software Intern

June 2021 - August 2021 (3 months)

Cambridge, England, United Kingdom

- Clearly documented how to interface the Pico board with various third-party hardware modules, like a GPS using NMEA protocol, to support hobbyists and external companies when developing projects.
- Worked collaboratively using version control software (GitHub) to co-develop by branching and merging code.

<https://github.com/raspberrypi/pico-examples>

Department for Business, Energy and Industrial Strategy (BEIS)

Work experience

October 2019 - October 2019 (1 month)

London, England, United Kingdom

- Presenting a potential clean energy scheme that proposed additional wind farms.
- Assisting in judging smart system entries for the Innovation Fund against given success criteria.

Dell EMC

Work experience

July 2019 - July 2019 (1 month)

London, England, United Kingdom

- Worked on a robotics project, balancing costs and functionality under a tight deadline.
- Gained insight into the product sales cycle by tracking new server development.

- Delivered a winning presentation on Quantum Computing to a group of employees.

NALITS

Work Experience

December 2018 - December 2018 (1 month)

London, England, United Kingdom

- Designing a security system by considering requirements, usability features, stakeholders and feasibility.
- Learning how different sensors work and using a Raspberry Pi 3b to control them and interlink their processes using multi-threading.
- Creating programs that analyse video footage using OpenCV and Cuda to recognise objects with a suitable degree of certainty.

Education

University of Cambridge

Master of Engineering - MEng, Engineering · (October 2023 - June 2024)

University of Cambridge

Bachelor of Arts - BA, Engineering · (October 2020 - June 2023)

Bentley Wood High School Sixth Form

· (2018 - 2020)

Royal Academy of Arts

attRAct Programme, Fine/Studio Arts, General · (January 2019 - December 2019)

Bentley Wood High School

· (2013 - 2018)
